DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach placing a preformed ID in the ATIP signal of an optical disk. The ATIP signal is normally used on blank disks to tell the writing device what type of disk it is and to keep a constant velocity on the disk during writing, since there is initially no information on a blank disk. Placing information in the ATIP signal, that is later combined with a unique ID of each disk, to create an encryption program for encrypting the data on the disk, creates a different encryption program for each and every disk. This allows readers to later verify if the data has been illegally copied.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond Owens, registration number 22,363, on December 20, 2005.

IN THE CLAIMS:

20. (Canceled).

IN THE SPECIFICATION

At page 1, lines 4-11

Reference is made to commonly assigned U.S. Patent Application Serial No. 09/772,333 (now abandoned) filed concurrently herewith, entitled "Copy Protection Using a Preformed ID and a Unique ID on a Programmable CD-ROM" by Barnard et al, ~~U.S. Patent Application Serial No. 09/211,763~~ **U.S. Patent No. 6,188,659** filed December 15, 1998, entitled "Method for Insuring Uniqueness of an Original CD" by Mueller et al, and U.S. Patent Application Serial No. 09/393,527 filed September 10, 1999, entitled "Hybrid Optical Recording Disc with Copy Protection" by Ha et al; the disclosures of which are incorporated herein by reference.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 6,782,190 to Morito, discloses using a unique ID combined with the CCI to prevent copying of disks. This reference is different from the instant application because there is no preformed ID in the ATIP signal.
